About us

Every week, thousands of portable items are lost around the globe in taxis, airports, restaurants, and other locations. Coping with the loss of an expensive item can be difficult enough, but the cost of replacing it can pale in comparison to the loss of critical data some of these items contain. Studies reveal it can cost over €12,000 to re-enter just 20mb's worth of sales and marketing data.

How does it work?

Success Story

About 12 months ago, I bought a Blackberry and purchased a Yourecoverit.com label and did the whole registration thing. A few weeks ago I left it behind me in the magazine pocket on a flight into Dublin. I remember running over to lost and found in a total panic because my whole life was on that thingy. As I sat there filling in a form I got a call from Yourecoverit.com to say a stewardess had called and if I could hang on a few minutes, she'd bring it to me. What can I say? I was utterly gobsmacked!!! Thanks so much to everyone concerned.
